GENERAL DIRECTORATE FOR  
 CULTURAL ASSETS AND MUSEUMS

**MUĞLA MUSEUM**  
 FROM 9 MILLION YEARS

The Museum of Muğla was opened to visitors in 1994 when the plant and animal fossils unearthed in the Özlüce in 1993 began to be exhibited. The museum, which was used as a prison building for a while after the Republican Period, consists of 5 sections with 4 indoor exhibitions and 1 outdoor exhibition area.

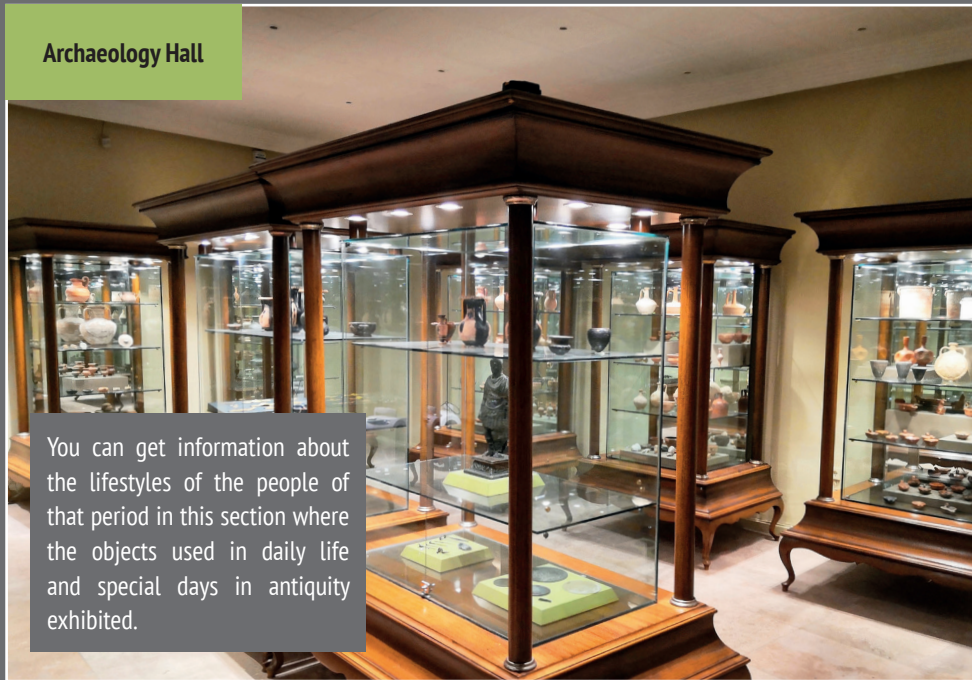

#### Natural History Section

Bones and plant fossils belonging to animal species that lived 9 to 5 million years ago in the Muğla region are exhibited in the first natural history hall of Muğla.

#### Courtyard (Outdoor exhibition)

The historical journey from the Classical Period to Eastern Rome continues here with our marble works.

#### Archaeology Hall

You can get information about the lifestyles of the people of that period in this section where the objects used in daily life and special days in antiquity exhibited.

#### Rescue Excavations Hall

Artefacts used in daily life and on special occasions from the Bronze Age to the Byzantine Period, which were found during the excavations carried out under the presidency of the Museum Directorate, are exhibited.

#### Gladiator Hall

Funerary stelas of gladiators, brutal and brave warriors of the past, await visitors.
